Environmental Civil Engineering

Glasgow Caledonian University | Full-time | Undergraduate

Distance: 0.22 miles

A Civil Engineer helps to make some of the most innovative structures in the world – the infrastructure for transport, energy, industry and commerce is the result of civil engineering.

The programme is designed to produce graduates as comfortable with the engineering and technical aspects of the industry as they are with contracts management and planning. Site visits are organised throughout the programme and have recently included the M74 motorway extension, the White Cart flood prevention scheme, new Forth Crossing and Whitelee Wind Farm.

Students can attend a five-day study trip to an...

Course details

Course description

Civil engineers design, build and operate the physical infrastructure that we rely on, and often take for granted – from bridges and buildings, to water treatment and waste management systems. Civil engineering involves applying physics and mathematics, along with engineering and computing tools, in a creative and sustainable way.

Our programme will train the civil engineers of the future with the knowledge and skills needed to help shape our ever-changing world. You will have the opportunity to specialise in a number of technical streams including structural, environmental, construction management, geotechnical and fire safety engineering. There is also a strong emphasis on engineering design throughout the degree programme.

As a member of Edinburgh' supportive and close-knit civil engineering community, you will benefit from a curriculum, teaching and design projects actively shaped by our industrial partners, alongside opportunities to interact with recent graduates working in industry.

Work experience and internships

You are encouraged to undertake relevant work experience during your degree. We work closely with the Careers Service to advertise internship opportunities and arrange company presentations.

We support your development of graduate attributes through our Edinburgh Award for Civil and Environmental Engineering Industrial Placements, which is recognised on your academic transcript.

How to guides

The resources situated below the Course search provide additional supporting content and resources in a range of formats e.g. text and video.

This includes advice on funding, applying for a course, different learning options and qualifications.

If you're not sure what course you would like, you will also find information to help you find out what you can do, and help with what you do next. If you have additional support needs, there are resources to help you find out more.

Find free online courses

Are you a furloughed worker or want to develop your skills? Online courses are a convenient and flexible way to learn.

Online learning

Find out about online learning and whether it's right for you.

Volunteering

Up for a fun, challenging new experience? Help others, and your career, by volunteering.

Funding

Thinking about your finances is important when you're looking at courses. Find out who can help, including information about Individual Training Accounts (ITA).

Applying for courses

Ready to apply? Competition for college and uni places can be fierce, but we can help. Find out how and when to apply, then use our tips and make your application stand out from the crowd.

Learning options

There are lots of different ways to learn. Find out about college and uni, learning on the job, online learning, volunteering, gap years, and attending open days and HE Conventions.

Qualifications

Find out what qualifications are available in Scotland, and who offers them.

Arm yourself with the knowledge you need to make the best choice, and then use the Course Search tool to find it.

My World of Work

How to guides

APPENDIX:

The Course and Volunteering search function uses a basic keyword search, and as such there are standard web conventions involved in searching multiple words:

Search text	Returns results where….	Example number of results
Flower	the word *flower* appears in *either* the title or the details	11
Arranging	the word *arranging* appears in *either* the title or the details	21
Flower arranging	EITHER the word *flower* OR the word *arranging* appears in *either* the title or the details	27 *
"Flower arranging" (in inverted commas)	BOTH the word *flower* and the word *arranging* appear TOGETHER in *either* the title or the details	5

* Note this will not be the same as the total of Flower and Arranging added together because some results will have both words, and will have been counted in results for both individual words.

Whatever search term is used, the results will be returned in "relevance" order – in other words, the more often the word or phrase appears in the result, the higher up it will appear in the list.
To sort in either alphabetical order, or by closest location if you specified a location in your search, use the selection drop-down at the top right of the results page.

As an example, a search for "flower arranging" might return results like "Millinery: Beginners (Evening Class)" and "Conduct the Internal Verification Process" – both of which might appear unrelated to the search term used. However, the first course mentions "Silk Flower Making", and the second includes "Arranging and conducting internal verification", so they are both actually correct.

It is impossible for the site to know the intended context of a word when used in a search, so it will return that word or term from whatever context. This does not mean the search results are wrong, but where the word is quite common and can be used in a number of situations (e.g. "Arranging") it might be worth using a more specific word or phrase.
